PROFESSIONAL SUMMARY

QA Engineer with 4+ years in fintech and open banking, combining automation expertise (Selenium, Appium, RestAssured) with a full-stack development background (Java Spring, Angular) to deliver gray-box testing at depth. Led BDD adoption across squads, cut manual regression cycles by ~60%, and drove quality across Open Banking, e-KYC, QRIS, and Loan Management platforms. Experienced with AI-assisted testing and cross-functional collaboration in Agile environments.

CORE SKILLS

Test Automation & Frameworks

- **Web & Mobile:** Selenium, Appium, WebDriverManager.
- **API Testing:** RestAssured, Postman, JMeter.
- **Methodologies:** BDD (Cucumber/Gherkin), TestNG.
- **Reporting:** Allure.

QA Methodologies

- **Testing Types:** API Testing, Black Box, White Box, Gray Box Testing, Smoke Testing, Usability Testing, Cross-device testing.
- **Cycles:** Regression Testing, Functional Testing, Unit Testing, and System Debugging.
- **Design:** Test Plan, Test Case Design, Requirement Analysis, and Structured Test Scenarios.

Technical Foundations

- **Languages:** Java, Groovy, HTML, CSS, SQL
- **Database & Monitoring:** MySQL, DBeaver, Kibana.
- **Development:** Full-Stack Development Basics (Angular 8, Java Spring)

Workflow & Tools

- **Collaboration:** Jira, Confluence, Zephyr Scale, Figma.
- **DevOps & Version Control:** Git, Fork, IntelliJ, VS Code.
- **Process:** Agile Practices, Hybrid QA (Manual and Automation) Approach.

WORK EXPERIENCE

Hybrid Quality Assurance Engineer (Fintech & OpenAPI Banking)

PT Digital Daya Teknologi (B2B Fintech, OpenAPI Banking SaaS) | 2022 – Present

- **Domain Expertise (OpenAPI & Loan Management):** Led end-to-end API and UI validation for the Open Banking Platform since 2022, expanding scope in 2026 to own the Loan Management System and drive cross-project stability.
- **Team Leadership:** Entrusted by my lead to guide QA colleagues from other projects during the Open Banking and Loan Management System initiatives, coordinating test data provisioning, resolving cross-project blockers, and providing technical solutions to keep testing unblocked.

- **SNAP API Coverage (Bank Indonesia Standard):** Validated end-to-end flows across the full SNAP Open Banking API suite, including: Account Registration (savings & e-money), Balance Inquiry, Transaction History, Intrabank & Interbank Transfer, BI Fast, Virtual Account (inquiry, payment, status), QRIS MPM & CPM, Direct Debit, OTC Transfer, and Webview integrations.
- **Cross-Project Impact** (e-KYC, QRIS, Mobile Apps): Dynamically contributed across cross-functional squads to validate critical mobile banking app features, e-KYC onboarding modules, and high-volume QRIS transaction flows.
- **Automation Engineering:** Built and maintained scalable UI and API automation frameworks using Selenium, Appium, Groovy, and RestAssured, cutting API regression time from a full working day to ~4 hours under tight release deadlines.
- **Framework Scalability:** Architected 70+ reusable test methods and contributed 82 automation-aligned test cases, significantly minimizing duplicate scripting and enhancing long-term framework maintainability.
- **Methodology Leadership:** Led the adoption of BDD/Gherkin methodologies across multiple project squads, mentoring team members in translating manual scenarios into Cucumber Step Definitions to scale test coverage.
- **AI Integration:** Leveraged AI-assisted SDET tools to accelerate test script generation, reducing scripting time and scaling automation coverage across multiple projects.
- **Defect & Ticket Management:** Executed 545+ comprehensive test scenarios across multiple projects using black, white, and gray-box techniques, efficiently resolving 152+ task tickets to accelerate development throughput.
- **Quality Improvement:** Documented 350+ bug reports in collaboration with PMs, POs, and Developers, achieving ~95% pre-production defect detection and significantly improving overall platform reliability.

KEB Hana Bank Indonesia | 2020–2022

Full Stack Engineer

- Built an E-Channel Management Information System (MIS) and a Pipeline Management System using Angular and Java Spring to facilitate bank-wide data reporting.
- Delivered BI Fast payment system modules in strict alignment with Bank Indonesia technical requirements.
- Directed debugging and performance enhancement efforts for core frontend and backend modules to ensure system stability.

(Previously: Credit Scoring & Review Intern | Aug–Dec 2019)

EDUCATION & CERTIFICATIONS

- **Bachelor of Information Systems** | Bina Nusantara University (2014–2019)
- **Certifications :**
 - SQL (Basic) Certificate | HackerRank (2026)
 - Exploring Playwright and TypeScript Essentials | CodeSignal (2026)
 - Microservices with Java Spring Boot & Spring Cloud | Udemy (2022)
